

Marco Island Area Association of Realtors

(Spark API Instructions)

Please Read All the Information Below:

How the agent and office/broker approve the Datamart requests.

1. Vendor creates an application and associate that application with a data set in our Spark account.
2. Once that process is complete, a notification will be sent to the agent for their approval.
3. Once the agent approves the request, the brokerage will then need to submit their approval.
4. Then the MLS will need to approve the request. After all approvals are received, we receive an API Token which is our approval / authorization.

To proceed with requesting IDX approval from the MLS/Board, we need you to send an email with the information below. **All fields are required to generate the form for IDX approval.**

Name of MLS:	<input type="text" value="Marco Island Area Association of Realtors"/>
Client First & Last Name:	<input type="text"/>
Client Email Address:	<input type="text"/>
Brokerage Name:	<input type="text"/>
Website URL:	<input type="text"/>
Clients Flex MLS Login ID:	<input type="text"/>

Send the above information to IDX@marketleader.com
